Title Index

A Bayesian analysis of stock return volatility and trading volume, 671
A comparison of short-term interest rate models: empirical tests of interest rate volatility, 505
A decomposition of the term structure model of Heath, Jarrow and Morton, 111
A fractional cointegration test of purchasing power parity: the case of selected members of OPEC, 559
A model and empirical test of the strong form efficiency of US capital markets: more evidence of insider trading profitability, 211
A multifactor model of gold industry stock returns: evidence from the Australian equity market, 21
A note on Credit Union reserve ratios and asset growth, 455
A numerical analysis of the monetary aspects of the Japanese economy: the cash-in-advance approach, 51
An application of generalized Vasicek term structure models to the UK gilt-edged market: a Kalman filtering analysis, 637

Beta, size and returns: a study on the French Stock Exchange, 13

Chaos in an emerging capital market? The case of the Athens Stock Exchange, 231
Common long-term and short-term price memory in two Scandinavian stock markets, 257
Consumer confidence announcements: do they matter?, 155
Continuous-time short term interest rate models, 401
Credit spreads on government bonds, 301

Determinants of the leasing decision in United Kingdom listed companies, 487
Do markets learn from experience? Price reaction to stock dividends in the Turkish market, 41

Efficiency and technical change for Spanish banks, 289
Efficiency in Australian building societies: an econometric cost function approach using panel data, 459
Efficiency of multinational banks: an empirical investigation, 689
Empirical tests of short-term interest rate models: a nonparametric approach, 347
Estimating structural exchange rate models by artificial neural networks, 541
Extreme events from the return-volume process: a discretization approach for complexity reduction, 267

Forecasting index volatility: sampling interval and non-trading effects, 477
Foreign banks, profits and commercial credity extension in the United States, 533
Fractional cointegration tests with GARCH, 329

Identifying credit and liquidity effects using a rank condition, 469
Intermediation and value-added models for estimating cost economies in large Japanese banks 1977–93, 653
International correlation structure of financial market movements: the evidence from the UK and the US, 1

IPO profit forecasts and their role in signalling firm value and explaining post-listing returns, 29
Is the dollar/ECU exchange rate a random walk?, 553

Linkages between the US and European equity markets: further evidence from cointegration tests, 607
Lower partial moment hedge ratios, 645

Managerial objectives in Japanese banking: a test of the expense preference hypothesis, 89
Market structure and performance in Spanish banking using a direct measure of efficiency, 191
Modelling real exchange rate behaviour: a cross country study, 577
Modelling the asymmetry of stock market volatility, 145
Monetary disturbance of financial market collapse: tests of two theories of the Great Depression, 133
Multivariate Granger causality in international asset pricing: evidence from the Finnish and Japanese financial economies, 67

New evidence on the expectations theory of the term structure of Australian Commonwealth Government Treasury yields, 81

On forecasting exchange rates using neural networks, 589
Ownership structure and firm performance: evidence from the UK financial services industry, 175

Portfolio analysis of South American stock markets, 315
Precious metals and inflation, 201

Real stock prices and the long-run demand for money in Germany, 513

Share prices under Tory and Labour governments in the UK since 1945, 389
Short and long-run dependence in Swedish stock returns, 435
Speed of adjustment to the long-run equilibrium: an application with US Stock Price and Dividend data, 367
Stock market prices, 'causality' and efficiency: evidence from the Athens stock exchange, 167

Term structure and interest differentials as predictors of future inflation changes and inflation differentials, 615
Testing the conditional CAPM using multivariate GARCH-M, 377
Testing the expectations model of the term structure in times of financial transition, 663
Testing the expectations theory in a market of short-term financial assets, 101
Testing the rationality of expectations in the Australian foreign exchange market using survey data with missing observations, 181
Tests for interest rate convergence and structural breaks in the EMS, 127
The Australian yield curve as a leading indicator of consumption growth, 627

0960–3107 © *1998 Routledge*

The causes of stock market volatility in Australia, 597
The contribution of emerging markets in international diversification strategies, 445
The determinants of non-bank financial institution efficiency: a stochastic cost frontier approach, 179
The diminishing calender anomalies in the stock exchange of Singapore, 119
The economic efficiency of the Credit Department of Farmers' Associations, in Taiwan, 409
The effectiveness of tightening illegal insider trading regulation: the case of corporate takeovers, 519
The expected favourableness of dividend signals, the direction of dividend change and the signalling role of dividend announcements, 221
The intertemporal stability of the covariance and correlation matrices of Hong Kong stock returns, 359
The long-run performance following Japanese rights issues, 419
The market efficiency hypothesis on stock prices: international evidence in the 1920's, 61
The mean-variance model with capital controls and expectations formation. A test on German portfolio data, 333
The relationship between US and Canadian wheat futures, 73
The unbiased forward rate hypothesis: are re-examination, 567

Uncovered interest parity: New Zealand's post-deregulation experience, 495

Volatility spillovers across equity markets: European evidence, 245

What causes intra-week regularities in stock returns? Some evidence from the UK, 353
